AromataGroup S.R.L. is a solid and innovative reference point for the production of flavours, aromatic extracts and colours for the food and beverage industry.

The mitigation and prevention of the source of pollution, as well as the improvement of environmental performances, are an essential component of our business, implemented thanks to the Environmental Management System (SGA), compliant with ISO 14001:2015.

Aiming to continuous improvements, the Management is committed to:

- Protect the environment and promote its protection, identifying and mitigating the risks related to its activities in every decisional and operational situation;
- Employ all necessary means to ensure regulatory compliance applicable to the SGA and to apply good practices;
- Apply the logic of risk management in processes;
- Adopt all technological and managerial measures to prevent and respond effectively in case of emergency;
- Promote an approach oriented towards environmental sustainability through information, training and education of employees, increasing awareness of the importance of each action to achieve the expected results;
- Maintain and promote an open dialogue with local communities and environmental authorities;
- Raise awareness and involve suppliers in the SGA practices.

The means available to achieve the objectives are:

- The annual environmental programme;
- The analysis of environmental performance indicators;
- Internal audits and non-compliance management;
- Management review;
- External and internal communication.

The Management
